

Blinkit E-Commerce Sales Analysis Project Report

1. Business Performance Overview :

Key KPIs

- **Total Sales:** \$1.20M
- **Average Sales:** \$141
- **Total Number of Items:** 8,523
- **Average Customer Rating:** 3.9

Business Insight

The business demonstrates stable revenue generation with strong product movement across multiple outlet formats. Customer ratings close to 4 indicate generally positive customer satisfaction levels.

2. Fat Content Analysis :

Key Findings

- Low Fat products generated approximately **\$776K** in sales
- Regular products generated approximately **\$425K** in sales
- Low Fat products contribute the majority share of total revenue

Business Insight

Customers show stronger purchasing preference toward Low Fat product categories, indicating increasing health-conscious buying behavior.

Recommendation

- Increase inventory availability for Low Fat products
- Expand healthy product categories and targeted promotions
- Use customer preference trends for future product planning

3. Outlet Size Performance :

Key Findings

- Medium-sized outlets generated the highest sales at approximately **\$507K**

- Small outlets contributed around **\$445K**
- High-size outlets generated approximately **\$249K**

Business Insight

Medium-sized outlets provide the best balance between operational efficiency and revenue generation.

Recommendation

- Prioritize expansion of medium-sized outlet formats
- Optimize performance of large outlets to improve profitability
- Improve product assortment in smaller outlets

4. Outlet Location Analysis :

Key Findings

- Tier 3 locations generated the highest sales at approximately **\$472K**
- Tier 2 locations contributed around **\$393K**
- Tier 1 locations generated approximately **\$336K**

Business Insight

Tier 3 cities outperform other regions, indicating strong demand and market growth opportunities in emerging urban areas.

Recommendation

- Increase expansion focus in Tier 2 and Tier 3 cities
- Launch region-specific marketing campaigns
- Strengthen logistics and delivery operations in high-growth areas

5. Product Category Performance

Top Performing Categories

Category	Sales
Fruits & Vegetables	\$178K
Snack Foods	\$175K
Household Items	\$136K
Frozen Foods	\$119K
Dairy Products	\$101K

Lowest Performing Categories

Category	Sales
Seafood	\$9K
Breakfast	\$16K
Starchy Foods	\$22K

Business Insight

Daily-use and fast-moving consumer goods dominate overall sales performance, while niche food categories contribute minimal revenue.

Recommendation

- Prioritize stock availability for high-demand categories
- Improve promotional strategies for low-performing categories
- Review pricing and customer demand for underperforming segments

6. Outlet Establishment Trends :

Key Findings

- Outlet growth peaked around **2018** with sales near **\$205K**
- Sales remained relatively stable between **2013–2022**
- Earlier-established outlets show consistent performance

Business Insight

Older outlets demonstrate stronger operational stability and customer retention compared to newer outlets.

Recommendation

- Replicate successful operational models from older outlets
- Strengthen onboarding and operational support for new outlets
- Analyze factors behind 2018 growth performance

7. Outlet Type Performance :

Key Findings

- **Supermarket Type1** generated the highest sales at approximately **\$787K**
- Grocery Stores generated around **\$152K**
- Supermarket Type2 and Type3 contributed similar performance levels

Business Insight

Supermarket Type1 outlets are the primary revenue drivers and significantly outperform other outlet formats.

Recommendation

- Increase investment in Supermarket Type1 expansion
- Apply successful strategies from Type1 outlets to other formats
- Improve product visibility and customer engagement in smaller formats

8. Customer & Product Visibility Insights :

Key Findings

- Average ratings remain consistently around 4 across outlet types
- Product visibility scores remain low across multiple outlet categories
- Higher visibility products tend to achieve better sales performance

Business Insight

Customer satisfaction is stable, but improving product visibility and merchandising can further increase sales.

Recommendation

- Improve in-store and dashboard product visibility strategies
- Use targeted promotions for high-margin products
- Enhance personalized recommendations and customer engagement

9. Risk Analysis :

Key Risks Identified

- Revenue heavily concentrated in limited product categories
- High dependency on Supermarket Type1 outlets
- Weak performance in specific food segments
- Uneven sales contribution across outlet formats

Strategic Recommendation

- Diversify product portfolio
- Strengthen underperforming outlet categories
- Expand regional revenue distribution to reduce dependency risks

10. Expected Business Impact

Implementation of the recommended strategies can lead to:

- Higher revenue growth
- Improved outlet profitability
- Better inventory optimization
- Increased customer retention
- Stronger regional market penetration
- Improved operational efficiency

11. Strategic Action Plan for Sales Improvement :

Based on the dashboard analysis, the following corrective and growth-focused actions are recommended to improve overall business performance and increase sales efficiency.

A. Actions for High-Performing Areas (Good Performance)

These areas are already performing strongly and should be further optimized to maximize growth.

1. Expand Medium-Sized Outlets

Reason: Medium outlets generate the highest revenue contribution.

Recommended Actions

- Open more medium-sized outlets in high-demand regions
- Increase inventory availability in these outlets
- Replicate successful outlet layouts and operations

2. Focus on Tier 2 & Tier 3 City Expansion

Reason: Tier 3 cities currently produce the highest sales.

Recommended Actions

- Increase marketing campaigns in emerging cities
- Improve delivery speed and customer service
- Launch localized promotional offers

3. Prioritize High-Selling Categories

Top Categories

- Fruits & Vegetables
- Snack Foods
- Household Products

Recommended Actions

- Ensure continuous stock availability
- Use combo offers and bundle promotions
- Increase visibility of fast-moving products

4. Strengthen Supermarket Type1 Outlets

Reason: This outlet type contributes the highest revenue.

Recommended Actions

- Invest more in Type1 outlet expansion
- Apply similar strategies to lower-performing outlet formats
- Improve customer loyalty programs

B. Corrective Actions for Weak Areas (Bad Performance)

These areas require immediate business improvements to reduce revenue loss and operational inefficiency.

1. Improve Low-Performing Product Categories

Weak Categories

- Seafood
- Breakfast Items
- Starchy Foods

Corrective Actions

- Review pricing and customer demand
- Introduce targeted discounts and promotional campaigns
- Replace consistently underperforming products

2. Optimize Large Outlet Performance

Issue: Large outlets generate lower returns compared to medium outlets.

Corrective Actions

- Reduce operational inefficiencies
- Improve inventory planning based on demand
- Increase product visibility and customer engagement

3. Reduce Revenue Dependency Risks

Issue: Sales are concentrated in limited categories and outlet formats.

Corrective Actions

- Diversify product offerings
- Expand revenue contribution across multiple categories
- Strengthen smaller outlet performance

4. Improve Product Visibility

Issue: Low item visibility may reduce customer purchases.

Corrective Actions

- Improve product placement strategies
- Highlight trending and high-margin products
- Use personalized recommendations and promotional banners

5. Increase Customer Satisfaction

Issue: Average customer rating is 3.9 and still has improvement potential.

Corrective Actions

- Improve product quality consistency
- Strengthen delivery and service experience
- Monitor customer feedback regularly

Conclusion :

The Blinkit Sales Dashboard provides a clear and data-driven understanding of the company's overall business performance, customer behavior, outlet efficiency, and product category trends. The analysis highlights that Blinkit has achieved strong revenue generation of **\$1.20M** with stable customer satisfaction and efficient sales performance across multiple outlet formats.

The dashboard identifies **Medium-sized outlets, Supermarket Type1, and Tier 3 cities** as the strongest contributors to total sales performance. Product categories such as **Fruits & Vegetables, Snack Foods, and Household Items** are driving the majority of revenue, while some categories and outlet formats require operational improvement and better strategic focus.

The insights also reveal several growth opportunities, including expansion in Tier 2 and Tier 3 markets, optimization of inventory planning, improvement of product visibility, and strengthening customer engagement strategies. At the same time, the report identifies risks related to revenue concentration and underperforming categories, which require corrective business actions.

Overall, the dashboard serves as an effective decision-support system for management by converting raw business data into actionable insights. By implementing the recommended strategic and operational improvements, Blinkit can improve profitability, enhance customer satisfaction, optimize resource utilization, and achieve long-term sustainable business growth through data-driven decision-making.
